

Answers to Questions often asked about ClearShield

Q: What is ClearShield?

A: ClearShield is a highly advanced formulated liquid polymer that is chemically inert, completely transparent, non-hazardous and temperature resistant. ClearShield will not crack, peel or discolor, and cannot be washed away with water.

Q: How does ClearShield keep glass clear?

A: Although ordinary glass looks and feels smooth, under microscopic examination its surface is actually full of tiny hills and valleys that attract and trap dust, dirt and other particles. A one-micron thick coat of ClearShield fills the valleys to create a tough, impenetrable barrier between the glass and elements that stain and give windows a dirty appearance.

Q: Is ClearShield available on other windows?

A: No. ClearShield is used exclusively on windows manufactured under the Vinyl-Lite brand.

The ClearShield Advantage...

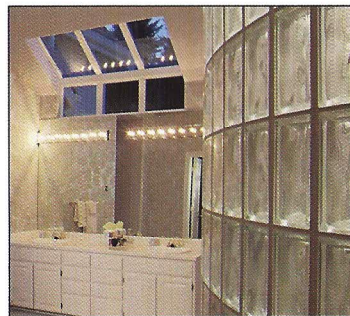

Keeps your
glass
so clean,
it's like
looking
through
an open
window!

Add to your Vinyl-Lite
window order today!

Just as unprotected metal rusts, unprotected glass deteriorates.

Your window glass is constantly exposed to dirt, grime, atmospheric pollution and other contaminants. Glass is actually relatively soft and porous and these contaminants chemically react with it, firmly bonding to its surface. Even regular washing will not completely remove them. In time, this will **permanently stain and damage the glass leaving it looking dirty and often impossible to clean**, no matter how hard you try.

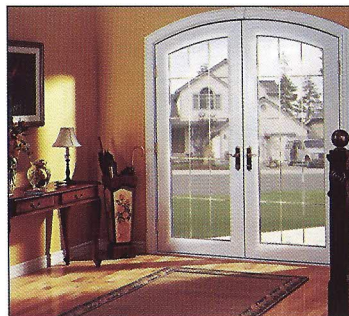

ClearShield will help keep your glass as clean and shiny as the day it was installed!

ClearShield is a unique polymeric resin that **protects glass like "non-stick" cookware**. It's an invisible protective barrier against dirt and other harmful contaminants that helps keep your glass clean and looking like new. ClearShield protected glass is **easier to clean and stays cleaner longer saving time effort and money**. Just think about not having to clean your windows nearly as often, especially those difficult to reach.

Now is the time to protect your Vinyl-Lite windows and keep them looking like new!

ClearShield protected glass...

- Stays cleaner longer because it keeps dirt and other contaminants from bonding to it
- Is easier to maintain because it's much quicker and easier to clean.
- Increases the quality and performance providing exceptional long term clarity and cleanliness
- Will enhance your home with its cleaner, brighter appearance
- Eliminates the need for harsh or abrasive cleaning products
- Will protect your investment
